

Migrating to Our New Learning

Section Team Members

A volunteer will need to have the required modules validated on Compass when they are mapped to be marked as having completed the related learning in Growing Roots

- Section Assistants will have learning to complete when they migrate and should continue to complete all relevant modules.
- Wood Badge roles should continue to work towards achieving their Wood Badge.
- It is recommended that any additional learning required is completed in the new learning tool.
- Modules can continue to be validated prior to migration.

Volunteers will need to complete any outstanding Growing Roots learning, which hasn't been credited through their migrated modules, once live on the digital tools:

Safe Scouting & Data Protection - Volunteers who haven't completed this learning will have six months from their previous role start date (from Compass) to complete this learning.

All other Growing Roots learning - Volunteers who haven't completed any other Growing Roots learning will have six months from go-live of the digital tools to complete this learning.
